Omschrijving

Ci160.2CL in-wall speaker features KEF’s patented Uni-Q driver array that allows sound to disperse more evenly throughout the room. The extremely shallow mounting depth allows you to install the Ci160.2CL where other speakers in its class won’t fit.

Ci160.2CL

Ci-C Series offers an ideal introduction to the world of custom installation speakers. Featuring KEF's sophisticated 'sit anywhere' Uni-Q driver array, which places the tweeter in the acoustic centre of the bass/midrange cone, this allows both the tweeter and woofer to act as a single point source that disperses the sound widely and evenly throughout the room. Weather resistant treatment protects the speakers from moisture and UV light. Ultra-Thin Bezels that are barely visible at the edge of exceptionally flat grilles mean the C Series fits unobtrusively into your home.
